

## Tonbridge Angels - GPS Technology

### OUR SUPPORT

Tonbridge Angels sought sponsorship for a set of GPS football vests designed to deliver insights into player performance. These vests provide real-time data on speed, power and endurance, enabling players to understand their strengths and target areas for improvement. Coaches can leverage these insights to create personalised training programs, optimising each player's development.

We proudly sponsored 16 GPS vests for the club. This investment supports Tonbridge Angels in its mission to empower students both on and off the pitch.

### THE OUTCOME

By equipping Tonbridge Angels with advanced performance-tracking technology, we are supporting young people in reaching their full potential. This initiative aligns with our mission to empower young people by providing the tools and opportunities they need to grow, develop and succeed. With data-driven coaching and tailored training, players are now better positioned to maximise their abilities and build confidence.

#### HOW WE HELPED

Empowering young people by providing the tools and opportunities they need to grow, develop and succeed.

## ABOUT THE CAUSE

Tonbridge Angels Football Academy provides 16-19-year-old students with the opportunity to play football full-time, whilst gaining nationally recognised qualifications. Their mission is to make sure that all of their students are immersed across a wide variety of subjects, enabling them to develop the skills, confidence and knowledge they need to progress into further education or full-time employment.

*We are truly grateful for the sponsorship funding for the GPS vests. We are hoping that we will see fast improvements in players' performance short term as we can quickly identify strengths and weaknesses and then create sessions to help improve an individual player's power, speed and aerobic endurance.*
